Jamaica

Date: 24/01/2025

PRICE LIST FOR CHEMOTECHNIQUE PRODUCTS

Valid from 1st February 2025 to 31st January 2026.

In principle, please contact AllerDerm Caribbean Ltd for a quotation for each contemplated purchase. However, overleaf is a Price List covering most Series, but not the ~550 individual haptens.

- Note all prices are stated in USD for the Caribbean region.
- The usual procedure for Chemotechnique in setting the new annual retail price has been to calculate with the Swedish rate of inflation, which is usually 2-3%. Unfortunately though, they have experienced significant price increases for the raw materials such as the fine chemicals which are obtained on the international market. Accordingly, Chemotechnique has increased their prices by an average of 5.0% from 2024 to 2025 for haptens and 4.0% for Chambers. Note that some Seris have changed during the period, resulting in corresponding changes in prices too. Note that due to the SEK depreciation against especially the USD during 2024, then the 2025 prices quoted in USD are in fact slightly less than in 2024.
- Retail prices are determined and set by Chemotechnique Sweden in SEK, in order to have a more-or-less uniform price for the products around the world.
- Retail prices for the Caribbean region stated in this Retail Price List in US\$ have been calculated from the 2025 Retail Price List in Swedish Kronor (SEK) currency stipulated by manufacturer Chemotechnique of Sweden, and converted by AllerDerm Caribbean Ltd at the forex rate of 24/01/2024 of SEK 11.03 to the US\$.
- For your presumed order, a formal price quotation is requested from Chemotechnique, originally in SEK but converted to USD (and GBP and EUR) on the date of Quotation. Therefore there may be a slight difference in the quotation price from the 2025 Retail Price List (this document).
- Note that as certain series, such as the NA-1000, have changed their number of haptens, then prices have been recalculated accordingly.
- Besides the quotation in USD, corresponding totals for GBP and EUR will also be provided, at current forex rates.
- This formal quotation for the products to be purchased will include also the delivery cost from Chemotechnique Sweden to you.
- Prices stated overleaf do not include delivery from Chemotechnique Sweden direct to the Purchaser. This will be charged at cost and will be included in the quotation from AllerDerm Caribbean Ltd.
- Prices stated overleaf do not include any Customs duties, taxes, fees, etc., that may be imposed by the country of receipt of the delivery. Nor are Customs agent's fees included. These costs are all the responsibility of the purchaser. A Customs Agent may be engaged in order to apply for any necessary Import Permit.
- Please notify us if you already have an account with the courier or freight forwarder that you wish us to use. Using your own courier account or freight forwarder may greatly simplify Customs clearance and the delivery process.
- Full payment to AllerDerm Caribbean Ltd must be made with the order. Part-payment by credit card is possible.
- Anticipated delivery lead time is 2-4 weeks, from Chemotechnique Sweden to the Purchaser.
- The purchaser is responsible for their own compliance with any relevant legal and medico-legal regulations, though AllerDerm Caribbean Ltd will assist as much as reasonably possible.
- For further useful information please see Supplementary Information Sheet 2025.
- For product information see www.chemotechnique.se . Sign up to enable full access.
- Any questions and for further information please contact AllerDerm Caribbean Ltd.
