Date: 01/02/2024

PRICE LIST FOR CHEMOTECHNIQUE PRODUCTS

Valid from 1st February 2024 until further notice.

In principle, please contact AllerDerm Caribbean Ltd for a quotation for each contemplated purchase. However, overleaf is a Price List covering most Series, but not the ~550 individual haptens.

- Note all prices are stated in USD for the Caribbean region.
- The usual procedure for setting the new annual price has been to calculate with the Swedish rate of inflation, which is usually 2-3%. However, for the past year Sweden, in common with many other countries, has experienced a high though declining rate of inflation, at 4.4% in January 2024. Unfortunately though, they have experienced large price increases for the raw materials such as the fine chemicals which are obtained on the international market. Accordingly, Chemotechnique has increased their prices by an average of **8.0%** from 2023 to 2024 for hpatens and **4.0%** for Chambers.
- Retail prices are determined and set by Chemotechnique Sweden in SEK, in order to have a more-or-less uniform price for the products around the world.
- Retail prices for the Caribbean region in US\$ are calculated from the Retail Price List in Swedish Kronor currency stipulated by manufacturer Chemotechnique of Sweden and converted by AllerDerm Caribbean Ltd at current (30/01/2024) forex rate of SEK 10.43 to the US\$. Note this is a 0.8% devaluation of the SEK against the USD compared to 12 months ago when it was SEK 10.35 to the US\$. This 0.8% depreciation of the SEK, combined with the average **8.0%** increase in export prices and retail prices in SEK has resulted in a price increase of approx. 8.0% in USD terms from 2023 to 2024 for haptens and 4.0% for Chambers. Note there was a *de facto* 6% price decrease in USD terms from 2021 to 2022 and 1.5% decrease from 2022 to 2023.
- Ask for a formal quotation for the products to be purchased, as well as the delivery cost from Chemotechnique.
- Prices stated overleaf do not include delivery from Chemotechnique Sweden direct to the Purchaser. This will be charged at cost and will be included in the quotation from AllerDerm Caribbean Ltd.
- For direct delivery from Chemotechnique Sweden to the purchaser in the Caribbean region there is a Minimum Order Value of approx. US\$2,000 per delivery at RRP. For orders below this value then delivery may only be via AllerDerm Caribbean Ltd based in Jamaica, in which case there will be additional costs for Customs and onward delivery.
- Prices stated overleaf do not include any Customs duties, taxes, fees, etc., that may be imposed by the country of receipt of the delivery. Nor are Customs agent's fees included. These costs are all the responsibility of the purchaser. A Customs Agent may be engaged in order to apply for any necessary Import Permit.
- Please notify us if you already have an account with the courier or freight forwarder that you wish us to use. Using your own courier account or freight forwarder may greatly simplify Customs clearance and the delivery process.
- Full payment to AllerDerm Caribbean Ltd must be made with the order. Part-payment by credit card is possible.
- Anticipated delivery lead time is 2-4 weeks, from Chemotechnique Sweden to the Purchaser.
- The purchaser is responsible for their own compliance with any relevant legal and medico-legal regulations, though AllerDerm Caribbean Ltd will assist as much as reasonably possible.
- For further useful information please see Supplementary Information Sheet 2024.
- For product information see www.chemotechnique.se. Sign up to enable full access.
- Shelf life from date of manufacture is dependent upon the individual Hapten, from as much as 30 months to as little as 8 months for some volatile alcohol based Haptens.
- Any questions and for further information please contact AllerDerm Caribbean Ltd.
